

A woman with dark hair, wearing a white lab coat and blue nitrile gloves, is smiling and holding a blue Vileda Professional Microquick cloth. She is holding the cloth against a grey handle of a cleaning tool. The background is a blurred white surface, likely a piece of equipment. The Vileda logo is visible on the cloth and in the top right corner of the image.

## Manual pre-preparation of cleaning cloths

# Manual pre-preparation of cloths

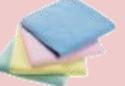

- Fold the needed number of clean cloths. In addition to the cloths you will need a measuring jug and a clean bucket suitable for preparation.
- Measure the correct amount of cleaning solution into the jug and pour the solution into the clean bucket.
- Place the pile of cloths in the cleaning solution long side first. Allow the solution to soak for 5 seconds. Turn the pile of cloths around. The cloths will become evenly damp in few minutes.
